Claims 1-7 are presented for examination.

The remarks filed on March 27, 2009 have been received and entered.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mayfroy-Camine et al., LaHaye et al., Campbell et al. (6,177,419), Carpo et al. and Winkler et al. (Molecular Vision 1999) for the reasons set forth on pages 2-6 of the office action of December 29, 2008.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive for the reasons set forth on pages 4-6 of the office action of October 19, 2007 rejection. The combination relied upon references, even the submitted articles by the applicant show that oxidative mechanism plays a role in development of AMD. The fact that the submitted articles by the applicant do not use superoxide dismutase for the treatment of AMD, does not overcome the relied upon reference by the examiner which shows the use of superoxide dismutase for the treatment of oxidative damage such as AMD. The fact that the articles presented by the applicant do not show that the higher level of enzyme do not correspond to the severity of AMD, does not negate the correlation between oxidative mechanism and development of AMD.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
